Assumptions:

MEMBER and RESORT entity. The assumption made was that a resort could have zero MEMBERs at the time when the new resort was first acquired.

BOOK and UNIT entity. The assumption made was that a BOOKing may or may not be completed thus there can be zero or one UNIT.

RESORT and TOWN entity. The assumption made was that a RESORT should have at least one town around or nearby it for the members to visit.

TOWN and POINT OF INTEREST entity. The assumption made was that a TOWN should have at least one POINT OF INTEREST in it for the members to visit.

UNIT and RATE entity. RATE is used to identify the cost for a given period and is referenced by unit type and unit number.

MEMBER entity. There is a self-relative meaning and a member of a resort can invite others to join the membership.
